

Guest interactive services for mobile devices

HOTstream Mobile enables hoteliers to provide guest interactive services to iOS and Android mobile devices, creating an additional opportunity to communicate directly with their guests before, during and after their stay.

Guests can now easily access hotel services, make reservations to hotel facilities, restaurants, spa or golf, view their bill, order room service, get travel information, view live TV channels and video on demand movies and much more on their preferred device. Guests can most importantly communicate in real time with hotel staff and management!

HOTstream Mobile dedicates at least 20% of each screen for hotel's marketing, creating a canvas for the hotelier to advertise and promote multiple services and increase sale revenues for the hotel's facilities and partners, while enhancing the guests' experience throughout their stay.

MCOM MEDIA COMMUNICATIONS

MCOM Media Communications is one of the leading IT solution providers for hospitality, healthcare and telecom operators having a large network of partners and regional offices in Europe, North America, Middle East and Africa. MCOM designs, develops and operates advanced technology solutions for multiscreen environments, including applications for Smart TVs, set-top boxes, smartphones, tablets, laptops and digital signage monitors.

MCOM HOTstream is the only solution a hotel needs to promote and provide guest interactive services in a uniform way that is independent of the screen or device each guest uses. HOTstream is integrated with all hotel systems and offers hotel promotions, reservations, ordering, guest entertainment and connectivity. HOTstream includes a centralized CMS which enables hotel's personnel to input information once and make it automatically available to all devices.
